

## DRUG TESTING SERVICE

Kickstart provide a monitored urine testing service which can be used by social services, probation and solicitors to support legal cases including child residence, fitness to work and to prove drug free status for a clients own case or as a viable witness.

In addition to the testing service, Kickstart also offer a court report which can be used as evidence in court where necessary. Each report identifies the testing methodology, key dates and times and the results of each test provided. As a trusted service, Kickstart are currently working with 8 major law firms in Sheffield and are now looking to expand this service to the wider business community in South Yorkshire.

The cost of the individual monitored test is £50 and the supporting court report is an additional £60.

## KICKSTART: WHO WE ARE

Since 1995 Kickstart have developed and provided successful drug rehabilitation programmes for adults and have supported over 12,000 people. Kickstart has evolved from what was originally a drop in centre for addicts into a leading rehabilitation centre for anyone who needs and wants to combat a drug problem. In particular, we treat those addicted to Heroin, Crack Cocaine and Amphetamines.

Whilst some of our current service is funded by the Sheffield Drug and Alcohol Action Team (DAAT), our charitable activity which ensures the continuous success of Kickstart's service and client support, remains unfunded. By using this service, you are supporting the valuable work we do with the vulnerable adults in Sheffield and making a positive impact to the community you live and work in.

If you would like further information about the services offered please contact Janet Bower, Administration Manager, on 0114 279 6734 or email [kickstartltd@kickstartsheffield.org.uk](mailto:kickstartltd@kickstartsheffield.org.uk)
